<sup>2</sup> During 2013, Compagnie de Financement Foncier reviewed the treatment of foreign exchange differences with reference to balance sheet items to determine the hedging ratio. Assets and liabilities items are now recognised at historical cost for this calculation, i.e. after taking into account their initial currency hedging; previously, foreign exchange differences were subject to netting, whatever the nature of the underlying hedge.

These modifications, which only cover the capital adequacy ratios, have required adjustment when presenting the liabilities above and explain the variations in the items "Foreign exchange difference relating to hedging of balance sheet items" and "Other privileged liabilities". The data at end-December 2012 have not been recalculated according to this new method.

<sup>2</sup> En 2013, la Compagnie de Financement Foncier a revu le traitement des écarts de change relatifs aux éléments du bilan pour la détermination du ratio de couverture. Pour ce calcul, les éléments du passif et les éléments de l'actif sont maintenant retenus à leur coût historique, soit après prise en compte de leur couverture en change conclue dès l'origine ; précédemment, les écarts de change faisaient l'objet d'une compensation, quelle que soit la nature du sous-jacent couvert.

Ces modifications qui ne concernent que les éléments du ratio prudentiel ont nécessité des ajustements dans la présentation du passif ci-dessus et expliquent les variations des postes « Écart de change lié à la couverture des éléments de bilan » et « Autres ressources privilégiées ». Les données à fin décembre 2012 n'ont pas en effet été recalculées suivant la nouvelle méthode.
