whether or not exposures in	n the form of covered bonds are eligible to preferential treatment under Regulation	(EU) 575/2013 is ultimately a matter to be determined by a relevan	nt investor institution and its relevant supervisory authorit	ty and the issuer does not accept any responsibility in this regard.

Interest rate risk								
	Hedging transactions							
	Both Assets and Liabilities are hedged for currency and interest rate risks.							
	Macro-hedging swaps are entered into when acquiring loan portfolios, while micro-hedging swaps are used for single transactions. Credit Foncier acts as counterparty on the swaps hedging the loan portfolios sold to Compagnie de Financement Foncier and on the majority of the vanilla swaps hedging the bonds issued by Compagnie de Financement Foncier. Major international banks act as counterparties on the swaps hedging the rest of the transactions.							
			eements with Compagnie de Financement Foncier that require them to post collateral depending on their deb ipulate that Compagnie de Financement Foncier shall not deposit any collateral.					
	Interest rate positions are reviewed each quarter and macro-hedged if found that the position has deteriorated to an extent that might result in non-compliance with the strict limits that Compagnie de Financement Foncier has committed to. Whenever early repayments exceed budgeted amounts, an interest rate swap is entered into in order to minimize the open position.							
	Basic risks, resulting from different reference rates on positions already transformed into variable rates by swaps, are managed through macro hedges.

FRENCH NATIONAL COVERED BOND LABEL REPORTING TEMPLATE

<u>Unless detailed otherwise</u> all amounts in EUR millions (without decimals) percentages (%) with 1 decimal time periods in years (with 1 decimal)

Group level information, senior unsecured ratings and covered bond issuer overview

1.2 Ratings of the parent company of the group in which the CB issuer is consolidated.

Covered bond issuer ratings

The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of refering to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases. If no "CB issuer rating" has been granted to the CB issuer, "NA" should be indicated.

Covered bonds and cover pool

<u>Guaranteed loans or mortgage promissory notes:</u>
If the eligible assets are transfered into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

"Of which assets eligible to CB refinancing" : The outstanding amount of eligible assets including replacement assets shall be filled in.

The eligible amounts only take into account assets which fulfill the legal eligibility criteria to the cover pool. E.g., for residential loans to individuals, the eligible amounts are limited to 80% of the value of the pledged property for mortgage loans or of the financed property for guaranteed loans. The legal coverage ratio's weightings of eligible assets are not taken into account in this calculation (e.g. a loan guaranteed by an eligible guarantor with an LTV level below the 80% / 60% cap is entered for 100% of its outstanding amount regardless of the guarantor's rating). The total amount is the same as the one used in the numerator of the legal coverage ratio. In particular, it excludes the amounts exceeding the LTV limits as well as all repurchase agreements.

3.

<u>Contractual maturities:</u>
Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets.

Expected maturities

The assumptions underlying the calculation of the expected WAL and expected maturity breakdown shall be disclosed for each element of the cover pool including substitute assets.

Interest rate and currency risks

Internal swaps: swap counterparties are part of BPCE group (Crédit Foncier & Natixis)

External swaps : swap counterparties are entities outside BPCE group

Residential cover pool data

Amounts in this section do not take account of impairments

4.2 - 4.3 Geographical distribution / regional breakdown

The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of

Unindexed current LTV

Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.

4.5 Indexed current LTV

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology

The loan-to-value ratio on residential mortgage loans is the ratio of the outstanding principal over the value of the underlying real estate. Collateral is revalued annually to monitor compliance with this ratio. The regulatory annual valuation of underlying assets is based on a prudent assessment of the property's long-term characteristics, local market conditions, the current use of the property and other possible uses. All of this information is provided by Foncier Expertise, Crédit Foncier's wholly-owned, Veritascertified subsidiary. The Specific Controller monitors these appraisals each year to verify compliance with the real-estate market parameters used in the valuation process, as described in the risk report section of the Registration Document 2016 (pages 155 - 167).

4.10 Interest rate type

"Floating" includes loans with interest rate reset periods not exceeding one year.

"Mixed" shall be used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initial fixed rate switching to floating) or for loans whith interest rate reset periods exceeding one year

Public Sector cover pool data
